Summary

Self-taught Senior Frontend Engineer (5+ years) skilled in React.js, Next.js, and TypeScript, specializing in scalable architecture, performance optimization, and SEO (SSR/SSG). Enhanced performance by 30% and reduced bugs by 60%. Experienced in WCAG, Core Web Vitals, REST/GraphQL, and Agile development. Globally **Published Author** with strong communication and stakeholder collaboration skills.

Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend & APIs:** Node.js, Express.js, REST APIs, GraphQL
- **State & DB:** Redux, Context API, MongoDB, MySQL
- **Architecture:** Micro-frontends, SSR, SSG, Component-Based Architecture
- **Performance:** Core Web Vitals, Code Splitting, Lazy Loading, Lighthouse
- **Testing:** Jest, React Testing Library, A/B Testing
- **Tools:** Git, CI/CD, Docker, Vite
- **Practices:** Agile/Scrum, Cross-functional Collaboration, WCAG Accessibility
- **Remote Work:** Virtual collaboration (Microsoft Teams, Zoom), Time Management, Documentation, Time Zone Adaptability, Remote Onboarding

Work Experience

Senior Frontend Engineer

Jan 2021 – Present

Promit and Company - Government-registered Startup, India

- **Built** and scaled **micro-frontend architecture** with React.js, Next.js, and TypeScript, enabling faster and independent deployments.
- **Increased** application performance by **30%** by optimizing Core Web Vitals through code splitting and lazy loading.
- Delivered **SEO-first applications** using SSR/SSG, improving page speed and search visibility.
- **Cut** production bugs by **60%** via TypeScript adoption, automated testing, and CI/CD pipelines.
- **Led** frontend initiatives, collaborated with backend teams, and boosted delivery speed by **40%**.
- **Collaborated with cross-functional backend teams** to design and integrate **high-performance RESTful APIs and GraphQL schemas**, ensuring seamless data flow and optimized payload delivery.

Projects

1. **Real-Time Wildfire Tracker-** (React, Leaflet, NASA API) -Live | [Github](#)
 - Built a scalable real-time web application delivering live geospatial wildfire data.
 - Optimized rendering for large datasets, ensuring smooth performance and cross-browser compatibility.
2. **Online Bookstore (Author Platform)-** (JavaScript, PayPal SDK) -Live | [Github](#)
 - Coded a responsive e-commerce platform for selling self-authored books.
 - Integrated secure payment processing using PayPal SDK.
3. **BreakOut Game-** (JavaScript, HTML5 Canvas) -Live | [Github](#)
 - Created a browser-based arcade game showcasing strong core JavaScript skills.
 - The classic Nintendo Brick Breaker game using pure Vanilla JavaScript and HTML5 Canvas, demonstrating strong fundamentals without relying on any frameworks.

Open Source

1. **Laughy (Firefox Extension)** -Live | [Github](#)
 - Built a browser extension generating random dad jokes to enhance developer experience.
2. **funny-error-excuse (NPM Package)** -Live | [Github](#)
 - Deployed a Node.js package displaying humorous error messages to reduce debugging frustration.

Education

Diploma in Electronics and Communication Engineering — Ranchi University, India - 2009-2012
Bachelor of Arts (History) — Vinoba Bhave University, India - 2016-2019
